PARIS IS OPTIMISTIC IN CHINA BANK CASE

Hope of Rescue Causes Investing Public to Shake Part of Its Timidity.

SOME BONDS SELL WELL

Steel Combination Similar to Those in U. S. Is Sprouting in France.

Special Cable to THE NEW YORK HERSLE. Copyright, 1921, by The New York Henal. New York Herald Bureau, Paris, July 9.

The Bourse presented many peculiari ties last week owing to the excitement over the affairs of the Banque Industrielle de Chine, combined with the approach of the vacation period, loans forthcoming from the cities of the devasapproach of the vacation period, loans forthcoming from the cities of the devastated regions, reports from the United States regarding Mexican oil stocks, and last but not least evidence that the Government has decided that the future depends entirely upon internal financial solidarity being attained at all costs.

Hesitancy of investors was somewhat relieved toward the end of the week by the prospect that the Banque de Chine

the prospect that the Banque de Chine can be rescued at least partly fom its upset, and it is believed that the next fortnight will see an awakening interest in numerous bond issues being offered in the financial markets.

Of these, the City of Paris 6 per cents. Of these, the City of Paris 6 per cents, are commanding the greatest attention with the Rheims and Verdun loans also finding favor. However, numerous industrial loans, such as those launched by a group of sugar refiners and by the Compagnie Generale des Tabaca, are having unexpected success. There is plenty of coin in the woollen stockings of the French peasants, and it seems that until the Government's policy is more clearly defined the purely industrial issues will reap the benefit.

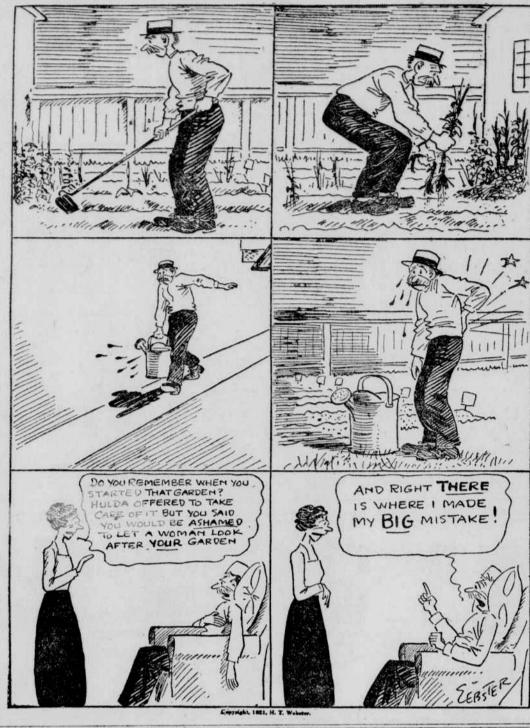

Some idea of France's investing dates

some idea of France's investing ca-pacity can be gained from statistics fur-nished to THE New YORK HERALD bureau from an authoritative source that in the first six months of the year almost 5,000,000,000 francs was found for the 5,000,000,000 francs was found for the creation of new corporations or for increasing existing capital stock, this exceeding the highest record for emissions of national loans or Treasury bonds.

Two year bonds, however, had considerable success during the month upon being offered to the public. The income from these, coupled with the sudden interest in National Defence hands, enabled the Government to re-

sudden interest in National Defence bonds, enabled the Government to refund to the Bank of France 1.700,000,000 francs, bringing the indebtedness down to 25,000,000,000 francs. In the seven weeks involved in this transaction note circulation diminished 1,340,000,000 francs. Idttle activity is believed to be possible in industrials generally, but close observers are expecting an early improvement in metallurgicals following the news that certain large iron and steel mills are seeking a policy of agreement with Luxemburg and Belgian mills with a view to meeting German competition, as revealed in the exclusive interview of The New York Herald Correspondent with Eugene Schneider, president of the Schneider Creusot Works. It is generally believed that this is another step toward the Creusor works. It is generally believe that this is another step toward the formation of a steel combination along American lines, such as was foreseen in the recent amalgamation of more than forty mills of allied companies in
